

# Product data sheet

## T-Stop guide rail

### Product features

- Holds doors without door closer open, not self-closing
- Can be used for right and left hand doors without conversion
- The door opening angle is limited and a door stopper is usually no longer required
- Doing with door stoppers enhances the appearance of the door area, stumbling hazards and dirty corners disappear
- Crushing between the door leaf and floor mounted door stopper is avoided

### Application Areas

- Right and left single-action doors
- Opening restrictor for single-action doors without door closer
- Door systems without smoke and fire protection requirements
- For combination of an automatic swing door drive with a GEZE TS 5000 on double leaf door systems
