

Certificate P-4022/10 (English Issue)

(valid only in association with the terms overleaf)

Approval owner: GEZE GmbH
Reinhold-Vöster-Straße 21-29, 71229 Leonberg

Production plants: GEZE GmbH
Reinhold-Vöster-Straße 21-29, 71229 Leonberg

Type Approval Mark:

Validity period until:
31/12/2021

Product: Automatic curved sliding door for use in escape and rescue routes

Model: Slimdrive SC-FR

Testing based

on the following:

- Directive on automatic sliding doors in rescue routes (AutSchR): 1997-12
- DIN 18650-1/2:2010-06
Powered pedestrian doors
- DIN EN 16005:2013-01
Power operated pedestrian doorsets – Safety in use
- DIN EN 60335-1:2012-10
Household and similar electrical appliances – Safety
- DIN EN 60335-2-103:2016-05
Household and similar electrical appliances - Safety
Part 2-103: Special requirements for drives for gates, doors and windows
- DIN EN ISO 13849-1/2:2016-06 and 2013-02
Safety of machinery - Safety-related parts of control systems

as well as applicable standards, regulations and directives listed in the
aforementioned test specifications.

Result of testing:

The requirements listed in the test principles are fulfilled by the product.

The approval for use of the test mark shown above is thus given, in accordance with the conditions printed on the reverse. This certificate replaces certificate P-4022/10 dated 19/04/2013.

Head of the Test Centre

Conditions

for use of the "Type tested" mark

This approval is only valid for the company and the production plant named on the reverse. It can only be transferred to third parties by the test centre.

The right to use the mark shown only covers such products that correspond to the types inspected by the test centre and listed on the reverse.

All products for which the mark is used must be marked with the company logo (mark of origin) submitted to the test centre. The mark and the company logo must always be applied together on or in the same parts, in the same way if possible, so that they are durable and clearly visible.

The owner of the approval is obliged to monitor production of the products that have been awarded the mark constantly for correlation with the test specifications and in particular to carry out the tests defined by the test specifications or required by the test centre properly.

In addition, he is obliged to tolerate the necessary inspection measures carried out by the test centre to monitor production and ensure the mark is used correctly.

In addition to the above-listed conditions, all the other conditions in the contract regulating the award of mark approval and the use of the TÜV Thüringen test mark shall apply. It is valid as long as the test principles on which the test has been based are valid unless they are not withdrawn earlier on the basis of the above-mentioned contract.

This approval document must be returned to the test centre if it is no longer valid due to termination or any other reason mentioned in the above-mentioned contract.
