

GEZE TRAININGS

# Seminars and workshops as needed

## WE ALWAYS KEEP YOU UP-TO-DATE

The more you know, the faster and more successfully you get to your goal. Secure your knowledge lead with our new GEZE seminar programme. We offer extensive qualification courses on GEZE products in selected online seminars and in our training centres at Leonberg, Garching, Neu-Isenburg, Düsseldorf, Kleinmachnow and Hamburg. Planning questions are examined as well as installation and settings for GEZE products. In workshops we go deeper into subjects and show how you can implement them in practice. In the expert knowledge courses, the participants obtain GEZE manufacturer's authorisation for commissioning, testing and maintenance.

For GEZE products such as hold-open systems, automatic door systems, smoke and heat extraction systems and emergency exit systems not only increase the comfort in a building, they are also always components of a safety concept.

That is why building laws set strict standards for the installation, testing and maintenance of such systems. Our programme also offers appropriate courses here – and you will find seminars on standards and guidelines, as well as their realisation in practice.

Of course, networking is not forgotten either during our seminars and presentations. And if you cannot find the right seminar for you in our programme, GEZE will be happy to put together an individual offer for you.

Please do not hesitate to get in touch with us – we look forward to welcoming you soon!

## LOGIN

---

This brochure shows our trainings provided in German language in our German locations. For individual seminars in your country and language please contact our local branches. Addresses can be found on page [www.geze.de/en/services/trainings-and-seminars](http://www.geze.de/en/services/trainings-and-seminars):

GEZE GmbH | Academy

Seminar Telephone: +49 7152 203-6470

Seminar fax: +49 7152 203-6479

## GEZE TRAININGS

# Basic seminars

### Brief description and objectives

What GEZE product is ideal for your specific applications? What are the extension possibilities as a result of appropriate accessories? What guidelines do electrical planners need, for example, so that the installation makes it to the finish line seamlessly? Learn about the entire spectrum of the GEZE offer here concerning door and window technology and have confidence when advising customers. In addition, you will learn about alternative GEZE solutions that open up potential for your future management development.

→ **Note:** The basic seminars are the pre-condition for participation in the practical seminars with expert knowledge. In Leonberg, the basic seminars include a tour of the factory.

# Door closer technology and hold-open systems

GS 114

1 day

4-12 participants

Online  
Seminar

## BRIEF DESCRIPTION

This seminar gives you an overview of the entire spectrum of GEZE door closers and hold-open systems, including technology behind them. This gives you the confidence for advising customers. In addition, you will learn about alternative GEZE solutions and can use this expertise for your management development. After completing the seminar, you will know which GEZE product is ideal for your specific applications, you have insight into the extension possibilities as a result of the right accessories and you will know the specifications the electric planners need, for example, for smooth installation.

## TARGET GROUP

Back-office and field sales employees in door fitting retail  
Employees with planning or installation tasks

→ **Note:** Please note that for qualification as an expert, the seminar  
GS 250 "Practical and expert knowledge of GEZE hold-open systems" must also be booked.

## CONTENTS

- Product overview of door closers and hold-open systems
- Areas of application, system design and components
- Discussion of the technical documents and planning-relevant provisions
- Information about accessories
- In Leonberg, this seminar includes a tour of the factory

+ DATES: [GEZE.COM/EN/SERVICES/TRAININGS-AND-SEMINARS](https://www.geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# Automatic sliding door systems

GS 123

 1 day

 4-12 participants

## BRIEF DESCRIPTION

This seminar gives you an overview of the entire spectrum of the automatic sliding door systems from GEZE. This gives you the confidence for advising customers. In addition, you will learn about alternative GEZE solutions and can use this expertise for your management development. After completing the seminar, you will know which GEZE product is ideal for your specific applications, you have insight into the extension possibilities as a result of the right accessories and you will know the specifications the electric planners need, for example, for smooth installation.

## TARGET GROUP

Back-office and field sales employees in door fitting retail  
Employees with planning or installation task

→ **Note:** Please note that for qualification as an expert, the seminar GS 262 "Practical and expert knowledge of GEZE automatic sliding door systems" must also be booked.

## CONTENTS

- GEZE ECdrive, Slimdrive SL NT and Powerdrive PL
- Areas of application, system design, components
- Discussion of the technical documents and planning-relevant provisions
- Information about accessories
- Sensors and activation devices
- Safety analysis
- In Leonberg, this seminar includes a tour of the factory

✚ **DATES:** [GEZE.COM/EN/SERVICES/TRAININGS-AND-SEMINARS](https://www.geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# Automatic swing door systems

GS 125

1 day

4-12 participants

## BRIEF DESCRIPTION

This seminar gives you an overview of the entire spectrum of the automatic swing door systems from GEZE. This gives you the confidence for advising customers. In addition, you will learn about alternative GEZE solutions and can use this expertise for your management development. After completing the seminar, you will know which GEZE product is ideal for your specific applications, you have insight into the extension possibilities as a result of the right accessories and you will know the specifications the electric planners need, for example, for smooth installation.

## TARGET GROUP

Back-office and field sales employees in door fitting retail  
Employees with planning or installation tasks

→ **Note:** Please note that for qualification as an expert, the seminar GS 252 "Practical and expert knowledge of GEZE automatic swing door systems" must also be booked.

## CONTENTS

- GEZE ECTurn, Slimdrive EMD, TSA 160 NT and Powerturn
- Areas of application, system design, components
- Discussion of the technical documents and planning-relevant provisions
- Information about accessories
- Sensors and activation devices
- Safety analysis
- In Leonberg, this seminar includes a tour of the factory

+ **DATES:** [GEZE.COM/EN/SERVICES/TRAININGS-AND-SEMINARS](https://www.geze.com/en/services/trainings-and-seminars)

Included in the price: Food + seminar documents

# GEZE SecuLogic emergency exit systems (RWS)

GS 132

 1 day

 4–12 participants

## KURZBESCHREIBUNG

This seminar gives you an overview of the entire spectrum of rescue routes and access control systems, as well as panic locks, from GEZE. This gives you the confidence for advising customers. In addition, you will learn about alternative GEZE solutions and can use this expertise for your management development. After completing the seminar, you will know which GEZE product is ideal for your specific applications, you have insight into the extension possibilities as a result of the right accessories and you will know the specifications the electric planners need, for example, for smooth installation.

## TARGET GROUP

Back-office and field sales employees in door fitting retail  
Employees with planning or installation task

→ **Note:** Please note that for qualification as an expert, the seminar GS 253 “Practical and expert knowledge GEZE SecuLogic emergency exit systems (RWS)” must also be booked.

## CONTENTS

- GEZE TZ 300 and TZ 320 door control units, access control systems, IQ locks panic locks, electric strikes
- Areas of application, system design, components
- Discussion of the technical documents and planning-relevant provisions
- Information about accessories
- In Leonberg, this seminar includes a tour of the factory

+ DATES: [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# Smoke and heat extraction systems

GS 143

1 day

4-12 participants

## BRIEF DESCRIPTION

This seminar gives you an overview of the entire spectrum of the GEZE window technology. This gives you the confidence for advising customers. In addition, you will learn about alternative GEZE solutions and can use this expertise for your management development. After completing the seminar, you will know which GEZE product is ideal for your specific applications, you have insight into the extension possibilities as a result of the right accessories and you will know the specifications the electric planners need, for example, for smooth installation.

## TARGET GROUP

Back-office and field sales employees in door fitting retail  
Employees with planning or installation tasks

→ **Note:** Please note that for qualification as an expert, the seminar GS 251 "Practical and expert knowledge of GEZE smoke and heat extraction systems" must also be booked.

## CONTENTS

- Chain, spindle and smoke and heat extraction drives
- Staircase control units, MBZ 300 modular bus control unit
- Areas of application, system design, components
- Discussion of the technical documents and planning-relevant provisions
- Information about accessories
- Safety analysis of power-operated windows
- In Leonberg, this seminar includes a tour of the factory

+ **DATES:** [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# Planning manual sliding wall systems (MSW)

**GS 046** 1 day 4-12 participants

## BRIEF DESCRIPTION

This seminar looks at the fundamental knowledge of the GEZE manual sliding wall systems (MSW), in particular examples of installation and planning. Through practical examples you deepen the knowledge gained. If you need specific knowledge about installation, please ask about seminars for installation engineers.

## TARGET GROUP

Back-office and field sales employees in door fitting retail  
Employees with planning or installation tasks

## CONTENTS

- Planning manual sliding wall systems (MSW)
- Use of check lists to document orders and taking measurements
- GEZE Systemshop
- Working with planning documents and price lists

+ DATES: [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

**For successful participation in our practical and expert seminars, participants must fulfil the following requirements. They must be**

- Engineers in the relevant field with at least five years of professional experience or
- persons with a corresponding completed training or
- persons with equivalent training and at least five years of professional experience in the field in which they wish to work.
- For the topics of SHEVS, RWS and automatic door systems, knowledge of electrical engineering is required (min. electrotechnical specialist for defined activities).

#### **PRACTICAL AND EXPERT KNOWLEDGE OF GEZE PRODUCTS**

GS 250 Hold-open systems

GS 262 Automatic sliding door systems

GS 252 Automatic swing door systems

GS 253 GEZE SecuLogic emergency exit systems (RWS)

GS 251 Smoke and heat extraction systems

GS 230 MBZ 300 parameter setting

GS 149 Installing manual sliding wall systems (MSW)

## GEZE FURTHER DEVELOPMENT OPTIONS

# Practical and expert knowledge

### Brief description and objectives

The GEZE products looked at in these seminars are safety-relevant. They need a careful check before commissioning and annually recurring services, in order to receive your statement of approval. In the two-day seminars you learn how to install hold-open systems, smoke and heat extraction systems (RWA), to commission automatic door systems or to set up emergency exit systems. In practical units, you practise attaching and connecting the individual components, learn about the settable parameters and test their effect on the respective plant. Use of every available document, for example wiring diagrams, assembly drawings and installation instructions is an important component of all these seminars. On the respective second day, all the legal aspects relating to installation, commissioning, testing and maintenance of GEZE products are considered. The pre-conditions for the training to become an expert are derived from the MBO (Model Building Ordinance), LBO (Regional Construction Ordinances), the state-specific (domestic) testing provisions and various guidelines, standards and manufacturer specifications.

→ **Note:** After successful completion, you receive a certificate documenting your GEZE manufacturer authorisation, limited to a period of four years.

# Hold-open systems

GS 250

2 days

4-12 participants

## BRIEF DESCRIPTION

In this seminar you will work theoretically and practically with installation, commissioning, testing and maintenance of GEZE hold-open systems. Specifically, you will learn how to work with wiring diagrams, the electrical wiring of a hold-open system, the commissioning, as well as the test and maintenance contents. You will receive check lists for your subsequent activity that will simplify the work for you. The seminar ends with a final test.

## TARGET GROUP

Employees with installation and service tasks

## PRE-CONDITIONS

We recommend participating in seminar GS 114 “Principles of GEZE door closer technology and hold-open systems” first if you do not have any product knowledge or installation experience.

Swing door drives on fire protection doors are simultaneously hold-open systems. For the qualification to commission these drives, the seminar GS 252 “Practical and expert knowledge of GEZE automatic swing door systems” must also be booked.

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, pre-commissioning testing, repair and recurring testing and maintenance of GEZE hold-open systems.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

## CONTENTS

### → Day 1 – Practical knowledge

- Installation
- Electric connections and settings of the GEZE door closers and hold-open systems

### → Day 2 – Expert knowledge

- Legal principles and standards
- Test and maintenance contents
- Check lists
- Final test

+ DATES: [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

# Automatic sliding door systems

GS 262

2 days

4-12 participants

## BRIEF DESCRIPTION

In this seminar you will work theoretically and practically with installation, commissioning, testing and maintenance of GEZE sliding door systems. In small groups you will practise installation of the GEZE fitting systems and the drive installation. We carry out the commissioning with you and explain the functioning of the most important activation and safety sensors. In addition, you will learn about various tools such as the parameterization device and GEZEconnects. You will receive check lists for your subsequent activity that will simplify the work for you. The seminar ends with a final test.

## TARGET GROUP

Employees with installation and service tasks

## PRE-CONDITIONS

Participation assumes the successful completion of seminar GS 123 "Principles of the GEZE automatic sliding door systems".

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, pre-commissioning testing, repair and recurring testing of GEZE automatic sliding door systems.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

## CONTENTS

### → Day 1 – Practical

- GEZE ECdrive, Slimdrive SL NT and Powerdrive PL
- Use of activation devices
- Installation, functions and settings
- Electrical connections of sensors and settings

### → Day 2 – Expert knowledge

- Tasks and duties
- Provisions and guidelines for automatic door systems
- DIN 18650 / EN 16005
- Check lists
- Safety analysis
- Final test

✚ DATES: [geze.com/en/services/trainings-and-seminars](https://www.geze.com/en/services/trainings-and-seminars)

# Automatic swing door systems

GS 252

2 days

4-12 participants

## BRIEF DESCRIPTION

In this seminar you will work theoretically and practically with installation, commissioning, testing and maintenance of GEZE swing door systems. After a successful installation of a swing door system, we explain the commissioning, the testing and maintenance contents. The functions of the most important activation and safety sensors are also addressed, along with the parameterization device and GEZEconnects. You will receive check lists for your subsequent activity that will simplify the work for you. The seminar ends with a final test.

## TARGET GROUP

Employees with installation and service tasks

## PRE-CONDITIONS

Participation assumes the successful completion of seminar GS 125 "Principles of the GEZE automatic swing door systems". Swing door drives on fire protection doors and simultaneously fire door holders. For the qualification to commission these drives, the seminar GS 250 "Practical and expert knowledge of GEZE hold-open systems" must also be booked.

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, pre-commissioning testing, repair and recurring testing and maintenance of GEZE automatic swing door systems.

→ **Note:** Please note the pre-conditions under § 3 of our general terms and conditions.

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

## CONTENTS

### → Day 1 – Practical

- GEZE Powerturn, Powerturn F/R / IS, Slimdrive EMD /EMD-F/R / IS, ECturn / Inside
- Installation, functions and settings
- Electrical connections of sensors and settings
- Settings in the service menu

### → Day 2 – Expert knowledge

- Tasks and duties
- Provisions and guidelines for automatic swing door systems
- DIN 18650 / EN 16005
- Check lists
- Safety analysis
- Final test

+ DATES: [geze.com/en/services/trainings-and-seminars](https://www.geze.com/en/services/trainings-and-seminars)

# GEZE SecuLogic emergency exit systems (RWS)

GS 253

2 days

4-12 participants

## BRIEF DESCRIPTION

In this seminar you will work theoretically and practically with installation, commissioning, testing and maintenance of GEZE SecuLogic emergency exit systems. In small groups you will connect the GEZE RWS TZ 320 emergency exit terminals and approved accessory components and set the parameters of the system for the customer. Bi-directional rescue routes are examined here, along with the connection to GEZE IQ lock locks. You will receive check lists for your subsequent activity that will simplify the work for you. The seminar ends with a final test.

## TARGET GROUP

Employees with installation and service tasks

## PRE-CONDITIONS

Participation assumes the successful completion of seminar GS 132 "Principles of the GEZE SecuLogic emergency exit systems (RWS)".

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, pre-commissioning testing, repair and recurring testing of GEZE SecuLogic emergency exit systems.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

## CONTENTS

### → Day 1 – Practical

- GEZE SecuLogic RWS TZ 320 with FTV 320 escape door lock
- System design, commissioning and settings
- TZ 320 networking and gateway function
- TE 220 and IQ lock motor lock control
- Electric strike

### → Day 2 – Expert knowledge

- Tasks and duties
- Provisions and guidelines for doors in escape and rescue routes
- Legal principles, common emergency exit protection
- Building inspection standards for electrical locking systems
- Technical specifications according to EltVTR (directive on the electrical interlocking of doors in escape routes) and EN 13637
- Testing escape and emergency exit systems
- Check lists
- Final test

+ DATES: [geze.com/en/services/trainings-and-seminars](https://www.geze.com/en/services/trainings-and-seminars)

# Smoke and heat extraction systems

GS 251

2 days

4-12 participants

## BRIEF DESCRIPTION

In this seminar you will work theoretically and practically with installation, commissioning, testing and maintenance of GEZE smoke and heat extraction systems. The focus of this seminar is on the connection and parameter setting of the GEZE IQ windowdrive drive technology for windows as well as on the work necessary on emergency power control units so that you can successfully implement the properties demanded in the fire protection concept of a smoke and heat extraction system in practice. The seminar ends with a final test.

## TARGET GROUP

Employees with installation and service tasks

## PRE-CONDITIONS

Participation assumes the successful completion of seminar GS 143 "Principles of the GEZE smoke and heat extraction systems".

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, technical functional testing, repair and recurring testing and maintenance of GEZE smoke and heat extraction systems.

- **Note:** In accordance with the applicable regional building regulations, specialists must be engaged to carry out the commissioning and recurring tests, if applicable, who confirm the effectiveness of the smoke and heat extraction system according to the fire protection concept.  
Please note the pre-conditions under s. 3 of our general terms and conditions.

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

## CONTENTS

### → Day 1 – Practical

- Chain, spindle and locking drives
- Opening and locking systems
- THZ and MBZ 30: emergency power control units: Installation, commissioning, settings

### → Day 2 – Expert knowledge

- Tasks and duties
- Provisions and guidelines for smoke and heat extraction systems (RWA)
- Legal principles
- Testing smoke and heat extraction systems
- Sources and deadlines
- Check lists
- Final test

✚ DATES: [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

# MBZ 300 parameter setting

GS 230

1 day

4-12 participants

## BRIEF DESCRIPTION

In this seminar, you will deal theoretically and practically with the structure and design of the GEZE MBZ 300 emergency power supply units. You will learn about the software operation and in the practical section will practise the switching of various functions, such as sequence control or wind direction-dependent control. The seminar ends with a final test.

## TARGET GROUP

Employees with installation and service tasks

## PRE-CONDITIONS

Participation assumes the successful completion of seminar GS 251 "Practical and expert knowledge of GEZE smoke and heat extraction systems".

## AUTHORISATIONS

Successful participation in this seminar authorises you to set the parameters in the software of the MBZ 300. Expert knowledge of the GEZE smoke and heat extraction systems is needed for the recurring testing and maintenance of GEZE smoke and heat extraction systems.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

## CONTENTS

- Basic structure of the MBZ 300 emergency power control unit
- Design of the MBZ 300, distribution of the connected consumers
- Introduction to the software, operation, difference between the old and new software versions
- Practical work with the software with connected MBZ 300 control unit, difference between software versions
- Final test

+ **DATES:** [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# Installing manual sliding wall systems (MSW)

GS 149

 1 day

 4-12 participants

## BRIEF DESCRIPTION

In this seminar you will learn about the components of a GEZE manual sliding wall system. You will become familiar with the installation and setting of the MSW system.

## TARGET GROUP

Employees with installation and service tasks

## AUTHORISATIONS

Successful participation authorises you to install, set, test and service the GEZE MSW.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

## CONTENTS

- Principles of GEZE manual sliding wall systems
- Use of check lists to document orders and taking measurements
- Practice in installing leaf glazing
- Installation and adjustment of the entire manual sliding wall system

+ **DATES:** [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

## GEZE FURTHER DEVELOPMENT OPTIONS

# Certificate extension expert knowledge

### Brief description and objectives

In accordance with existing regional regulations, it is the task and duty of a specialist to stay up to date with regard to the applicable building regulations and the generally recognised rules of technology. These seminars teach the current information about changes and the latest versions of the regulations. They offer a discussion forum of practical examples and the application of regulations. Please note that we also provide online trainings.

→ **Note:** The participants can expertly inspect GEZE systems according to the applicable guidelines and internal testing regulations, as well as carry out tests and maintenance for another four years.

# Hold-open systems

GS 350

1 day

4-18 participants

## TARGET GROUP

Employees with installation, maintenance and service tasks

## PRE-CONDITIONS

Participation in the seminar "Practical and expert knowledge of GEZE hold-open systems" must not be more than four years in the past.

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, pre-commissioning testing and recurring testing of GEZE hold-open systems.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

## CONTENTS

- Repetition of legal principles and standards
- Test and maintenance contents and check lists
- Introduction to GEZE innovations
- Sharing experiences
- Final test

+ **DATES:** [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# Automatic door systems

GS 352

 1 day

 4-18 participants

## TARGET GROUP

Employees with installation, maintenance and service tasks

## PRE-CONDITIONS

Participation in the seminar “Practical and expert knowledge of GEZE automatic sliding and swing door systems” must not be more than four years in the past.

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, pre-commissioning testing and recurring testing and maintenance of GEZE automatic sliding and swing door systems.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

## CONTENTS

- Repetition of legal bases and standards
- Test and maintenance contents and check lists
- Introduction to GEZE innovations
- Sharing experiences
- Final test

+ **DATES:** [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# GEZE SecuLogic emergency exit systems (RWS)

GS 353

1 day

4-18 participants

## TARGET GROUP

Employees with installation, maintenance and service tasks

## PRE-CONDITIONS

Participation in the seminar “Practical and expert knowledge of GEZE SecuLogic emergency exit systems (RWS)” must not be more than four years in the past.

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, pre-commissioning testing and recurring testing and maintenance of GEZE automatic SecuLogic emergency exit systems (RWS)

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

## CONTENTS

- Repetition of legal principles and standards
- Test and maintenance contents and check lists
- Introduction to GEZE innovations
- Sharing experiences
- Final test

+ **DATES:** [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# Smoke and heat extraction systems

**GS 351** 1 day 4-18 participants

## TARGET GROUP

Employees with installation, maintenance and service tasks

## PRE-CONDITIONS

Participation in the seminar “Practical and expert knowledge of GEZE smoke and heat extraction systems” must not be more than four years in the past.

## AUTHORISATIONS

Successful participation in this seminar authorises you for installation, technical functional testing, repair and recurring testing and maintenance of GEZE smoke and heat extraction systems.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

## CONTENTS

- Repetition of legal principles and standards
- Test and maintenance contents and check lists
- Introduction to GEZE innovations
- Sharing experiences
- Final test

+ **DATES:** [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# MBZ 300 parameter setting including software license extension

GS 330

1 day

4-10 participants

## BRIEF DESCRIPTION

In this seminar, you will deal theoretically and practically with different software versions of the GEZE MBZ 300 emergency power supply units. You will practice operating the software and setting parameters of various functions, e.g. sequence control or wind direction-dependent control. In discussions with our experienced speakers, you will receive many ideas and tips for practical use. In addition, we will present innovations from the area of smoke and heat extraction/ventilation, e.g. IQ box KNX. The seminar ends with a final test.

## TARGET GROUP

Employees with installation and service tasks

This online-only seminar is aimed exclusively at people who regularly work with the software parameterisation of GEZE MBZ 300 systems. Experts who only rarely work on MBZ 300 systems should also book the GS 230 attendance seminar (practice + expertise GEZE MBZ 300 parameterisation) also for post-certification.

## PRE-CONDITIONS

Participation assumes valid certification from GS 251 "Practical and expert knowledge of GEZE smoke and heat extraction systems" and GS 230 "Practical and expert knowledge of GEZE MBZ 300 parameter setting".

## AUTHORISATIONS

Successful participation in this seminar authorises you to set the parameters in the software of the MBZ 300. "Practical and expert knowledge of GEZE smoke and heat extraction systems" is needed for the recurring testing and maintenance of GEZE smoke and heat extraction systems.

→ **Note:** Please note the pre-conditions under s. 3 of our general terms and conditions.

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

## CONTENTS

- Introduction to the software operation / software versions
- Practical work with the software with connected MBZ 300 control units, using the software versions
- Smoke and heat extraction system and ventilation innovations and IQ box KNX
- Final test

+ DATES: [geze.com/en/services/trainings-and-seminars](https://www.geze.com/en/services/trainings-and-seminars)

## WORKSHOPS

GS 155 Principles of building automation

GS 960 Sensors on automatic door systems

## GEZE FURTHER DEVELOPMENT OPTIONS

# Workshops

### Brief description and objectives

In the following workshops the participants deepen their knowledge of GEZE products and expand their expertise in order to remain successful in the market going forward. The focus is on practical work with work being carried out across products.

→ **Note:** Knowledge of the GEZE automatic door systems products is a pre-condition for participation in the workshops GS 960 "Sensors on GEZE automatic door systems".

# Principles of building automation

GS 155

1 day

6 participants

## BRIEF DESCRIPTION

In this seminar you will receive thorough knowledge for connecting GEZE door system components to the GEZE Cockpit. In addition, administration of the GEZE Cockpit is practised intensively in practical exercises.

## TARGET GROUP

Employees with installation and service tasks

## PRE-CONDITIONS

The online seminar GEZE building automation must have been attended and completed before participation in seminar GS155 Principles of GEZE building automation. Please bring a laptop with a USB port. The latest version of the browser Google Chrome must be installed. Knowledge about TCP/IP networks and their administration are very recommended.

## AUTHORISATIONS

Successful participation in this seminar authorises you to install, commission, test and service the GEZE Cockpit.

## CONTENTS

- Areas of application, system design and components of GEZE building automation
- Discussion of the technical documentation
- Connecting the GEZE products from the areas of automation and safety technology
- Administration of the GEZE Cockpit exercises

+ DATES: [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# Sensors on automatic door systems

GS 960

 1 day

 4-10 participants

## BRIEF DESCRIPTION

Sensors are important components of automatic door systems. In this seminar you will deepen your knowledge of the functioning and settings of the common sensors.

## TARGET GROUP

Employees with installation, maintenance and service tasks on automatic door system

## PRE-CONDITIONS

Participation assumes the successful completion of the seminar GS 252 "Practical and expert knowledge of GEZE automatic swing door systems" and/or GS 262 "Practical and expert knowledge of automatic sliding door systems".

## CONTENTS

→ Sensors of the GC 308, GC 338, GC 339, GC 363, GC 365, GC 342 Familie and others, in theoretical and practical application

+ DATES: [geze.com/en/services/trainings-and-seminars](https://geze.com/en/services/trainings-and-seminars)

\* excluding other price agreements or transfer of existing discounts based on your partner status.

Included in the price: Food + seminar documents

# **We are GEZE.**

## **For liveable buildings**

GEZE stands for innovation, high quality and comprehensive support of building technologies. From the initial idea, planning and operational implementation with standard products to customised system solutions and individual service and maintenance plans. We offer an extensive product range of door, window and safety technology products and are a major driving force behind the digital networking of building automation.
