## GEZE reorganises its website for customers and partners

GEZE focuses on maintaining close contact with customers and partners for solution-oriented projects. With a newly developed web presence, the company now aims to make information and services related to door, window and safety technology even easier to access.

### Your ticket to GEZE

GEZE opens doors – not just in buildings worldwide, but for customers and partners as well. The relaunch of the company's website at [www.geze.com/en](http://www.geze.com/en) focuses on user-centric operation. Potential customers will benefit from specialist technical information, services, and inspiration.

*“Global developments – especially in digital areas – are continually gaining pace. We also enjoy continuously developing our company and offering our customers even more added value,” says Andrea Alber, GEZE Managing Director Strategy. “Close collaboration with our customers helps us with this. We are close to the market and its needs, which enables us to develop customised solutions and services for the long-term.”*

### **Overview of the GEZE world**

The new page structures detailed information by product group and solution, including concrete application examples and services. This structure is supported by the design and new forms of technology, ensuring all users can find what they are looking for quickly and without extensive searching. The service bar and product finder are especially useful tools as they provide access to the desired product at any time. Users can also find important direct access points there – for instance to the GEZE portals, the distributor search, or the download area. Thanks to the easy-to-use navigation concept, the new website takes users quickly and intuitively to the area they are searching for within the building life cycle.

- Discover
- Products & solutions
- Planning
- Installation
- Services

### **Inspiring solutions and expertise from A to Z**

The ‘Discover’ area, for instance, invites users to dive into different topics and discover the world of GEZE. They can access additional information from a comprehensive knowledge base to deepen their understanding, for instance on topics such as ‘green building’, ‘building renovation’, or ‘window protection’. In addition, numerous international references prove how the intelligent combination of smart technology and experienced coordination of many different product groups can help create buildings worth living in.

Planners, installation engineers or end users who are interested in, for example, a specific door or window technology solution can access custom suggestions in the ‘Products & solutions’ area in a flash. Architects and planners will find all the support GEZE has to offer in the ‘Planning’ area – from Building Information Modelling (BIM) and tender texts to specialised planning training materials.

### Services to fulfil every need

3 | 4

In addition to seminars specially designed for architects and planners, GEZE offers numerous other training services. Product and installation training courses, for instance, introduce installation engineers to the GEZE product landscape. Customised after-sales service packages ensure reliable maintenance or retro-fitting as needed, for example. Customers and potential customers will now be able to access all the services more easily and quickly on the new GEZE website.

### GEZE networked – for buildings worth living in

As a specialist in door, window and safety technology, GEZE is also interested in sharing its extensive expert knowledge. GEZE specialists support customers and partners throughout the entire building life cycle – from planning to construction to after-sales services. This creates smart and networked buildings where everything functions perfectly – not just the combination of automatic door and window systems controlled by a building automation system such as the GEZE Cockpit. Professional collaboration between the experts involved in the project also runs smoothly.

## About GEZE

4 | 4

The GEZE brand stands for innovation and for top quality products, processes and services. GEZE is one of the leaders in the global market and it is a reliable partner worldwide for door, window and safety technology products and systems. No matter what the requirements of a building are – GEZE implements optimum solutions and combines functionality and security with comfort and design.

GEZE door closers open up numerous technical and visual possibilities. Every day, millions of people go through doors equipped with the overhead door closers from the TS 5000 series and enjoy the comfort of automatic door systems, e.g. the Slimdrive range. Barrier free door and window systems provide greater comfort, not only for people with restricted mobility. The glass systems and fitting solutions for the attractively designed sliding systems are the ultimate in design aesthetics. GEZE also offers a wide product range in the field of window and ventilation technology. Complete „intelligent“ smoke and heat extraction solutions (RWA) and a comprehensive selection of door systems for RWA air supply solutions are also available for preventive fire protection. GEZE's safety technology includes escape and rescue route solutions, lock technology, and access control systems.

The GEZE building management system provides an overview of a building's entire technical facilities. With its systems expertise, GEZE creates coordinated system solutions which combine individual functional and safety requirements in one intelligent system. GEZE product solutions have received numerous awards and can be found in renowned structures all over the world.

The company has a global presence with 31 subsidiaries, 27 of which are outside Germany, a flexible and highly efficient sales and service network, and 3,000 employees. In the 2017/2018 fiscal year, GEZE achieved a turnover of over 430 million euros.
